

## **AREA COVERED**

Greater Vancouver from the International Boundary (including Point Roberts, WA) North to 49°. 35' N West to the eastern shoreline of Howe Sound (including Bowen Island) and to the middle of the Strait of Georgia. East to 122° 33' W (260th St. in Langley and Maple Ridge) including all of Golden Ears Provincial Park.

## THE CHECKLIST

This checklist is divided into two parts: a list of 268 regularly occurring species (reported annually), and a list of 141 casual and accidental species (not reported every year).

For the regular species we present bar graphs indicating the seasonal occurrence and relative abundance of each. For the casual and accidental species because not all sightings have been critically reviewed, we cannot say exactly how many sightings there are for each. Therefore we have indicated for each season whether the species is accidental (1 or 2 records) or casual (3 or more records), without indicating dates for individual sightings.

<u>Checklist Committee</u>: Wayne Weber (chair), Brian Self, Ilya Povalyaev, and Larry Cowan.

Original Computer design by Tom Brown, Kyle Elliott & Rick Toochin. Modified 2018/08 by Larry Cowan.

Cover drawing of Black-throated Gray Warbler by Mark Wynja. Back cover drawing of Crested Myna by Glenn R. Ryder.

## **REPORTING RARE BIRDS**

Please report sightings promptly of accidental, casual or out of season species by completing a **Rare Bird Report Form** available on the Nature Vancouver website at:

http://www.naturevancouver.ca/Main\_Birding

Observers are also encouraged to report their sightings, rare, or otherwise to "eBird" (http://ebird.org). Photos of rare birds can be "embedded" in a list submitted to eBird.

Кеу:	
	Common: 25+ seen or heard daily
	Fairly common: 5-25 seen or heard daily
	<ul> <li>Uncommon: 0-5 seen or heard daily</li> </ul>
	- Rare: 1-10 records per year
	Casual: 2-20+ records; on average not
	seen every year; somewhat out of normal
	range.
0	Accidental: single record; usually far
	outside normal range (1-4 days stay)
>	Accidental: duration of stay (5+ days stay)
[1]	Introduced: species established for more
	than 10 years with an historically stable
	population.
*	Known to nest in checklist area
